FLUKE Infrared Thermometer Gun

Fluke 62 max

Temperature is often the first indication of potential problems in electrical and mechanical applications. But how can you easily determine if an electrical panel has a hot spot, a motor is overheating or an HVAC system is inefficient? The answer is with an infrared (IR) thermometer. With handheld, non-contact IR thermometers, you can instantly measure equipment temperatures in hard-to-reach or hazardous areas. And with early detection of abnormal temperatures comes early correction of problems. Designed with your on-the-job needs in mind, the new Fluke 62 MAX infrared thermometer is everything you'd expect from the experts in measurement tools. Small in size, extremely accurate and very easy to use. IP54 rated for dust and water resistance. Precise yet rugged enough to take a 3-meter drop. In fact, the 62 MAX is so tough, it's the only IR thermometer around you can handle without care.

We are Buss Fuse Headquarters

American made, quality fuses for most every application

Buss fuse is one of the largest fuse suppliers in North America. Buss takes the guesswork out of replacement options. By removing out-of-date cross reference charts other brands offer, Buss eliminates future problems in obtaining replacement fuses. This reduces the chances of incurring a costly machinery failure due to incorrect fuse protection. Calkins' stocks a wide range of fuses and block to meet your every need. Everything from basic cartridge and small glass fuses, to ceramics, low-peaks, and semiconductor fuses, and from 250 milliamps to 1200 Amps.
